

Thanks for purchasing the Sloting Plus product.

Remember that this item is not a toy and contains small parts that can be swallowed by a child.

This product is finished by hand to provide the best performance.

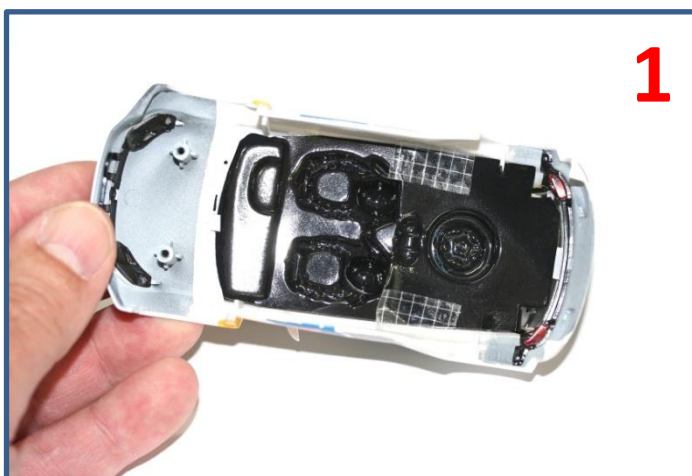

ADVICE:

Remember that all plastics are subject to expansion and contraction and in some cases is probable to require a slight adjustment between the support motor and the chassis. Use only guides with the stem of 3,6 mm diameter.

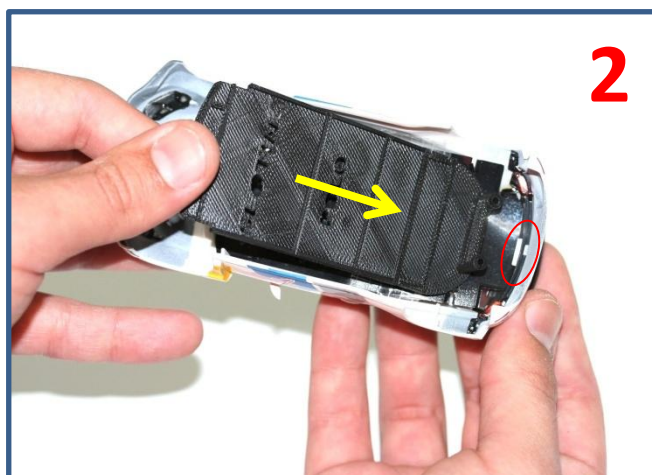

Handle with care and attention the base / support as it can break. Always use the special screws for body ref SP159901 included in the kit or SP159902 to 9,5 mm long or alternatively, metric screws M2,1 maximum.

NEVER use thread screws for metal or wood

READ CAREFULLY

Cut and paste the lexan cockpit as usual.

Fit the hole of the base/support in the rear tab of the body (red circle).
